

### **Dr Alex Scott – Biography**

Dr. Scott is a graduate of the UBC Physical Therapy program, and the UBC Experimental Medicine PhD program. His research targets a widespread problem, overuse injuries and chronically painful tendon disorder in workers and athletes. His research has been highlighted and supported locally by organizations including the WorksafeBC, Professional Association of BC and the Health Sciences Association, nationally through CIHR sponsored events and seminars, and internationally including sponsorship by the Canada-Scandinavia Foundation and the Swedish Research Council. He maintains active collaborations with Oslo University, Umeå University, and University of Paris. His work has been incorporated into widely used web-based clinical guidelines such as UpToDate®, and the Journal of Orthopaedic and Sports Physical Therapy clinical guideline on Achilles tendinopathy.
